

Anthony P. Matash
477 Elizabeth Lane
Campbell, Ohio 44405

Anthony Matash, is a life-long a native to the Mahoning Valley. He was born and raised in Niles, Ohio and made his home in Campbell 51 years ago with his wife Louise P. Nobile Matash. As a resident of the 4th Ward, he and his wife have been active members of the community, during which time they raised three daughters; Teresa (Theodore) Volsko, Mary (Douglas) Rozum and Debra (Arthur) Morris.

Mr. Matash attended Youngstown University, majoring in accounting prior to joining the military. He is a veteran of the United States Army. He began a lengthy career in the steel industry at Youngstown Sheet and Tube in 1958 working first as a laborer, then through a series of promotions, completing his tenure as Chief scheduler and shipping coordinator for the hot and cold strips. Anthony also served as superintendent of United Steel Service in Brookfield, Ohio. As a key member of the company's administrative team, his primary responsibilities were oversight and fiscal responsibility for the daily operations of the warehouse. During his 17 years of service with this steel warehouse, Anthony had many distinguished accomplishments. Perhaps the one he was most noted for was his instrumental role in the company's growth and development. He led the expansion to a second fabricating site in Newton Falls, Ohio.

After retiring, Anthony Matash remained an active member of the community. He currently participates as a member of the Campbell Golf League, in addition to being a member of the finance committee, and President of the Men's Society for St. Lucy Church. He was also appointed to the transition team, whose task is to lead the diocesan changes and merge the Roman Catholic parishes in Campbell into one community parish.

Anthony Matash's vision for Campbell, Ohio aligns with the city's strategic plan. He also believes that the transformation the Mahoning Valley has experienced over the past few years can continue. He believes that like Youngstown, Campbell can also be transformed into a great place to do business. His extensive knowledge and more than 40 years of experience in the steel industry will be an asset to city leaders as they plan to attract and retain business, especially manufacturing and fabricating plants.
